

Let us monitor your IT Infrastructure for you!

Integrated & Scalable Services Suite for Infrastructure Monitoring and Management.

- Our remote monitoring Services will empower you to focus on growing your business through complete concentration over your core business activities.
- We as your offshore or nearshore NOC can enable you to cut down service delivery costs and ensure the higher quality services to your end customers with our dedicated staff.
- Designed to quickly scale without costly overhead, our support staff will provide you with high value services and sustainable growth.
- This can justify your ROI realization as per planned IT budget.

80%
of SMBs lose at least
\$20,000
every year due to network
downtime

Why monitoring services are need of the time and business?

- ❖ Everything is accessed via the network: phones, email, faxes, data, mission critical systems, business apps etc.
- ❖ Clients have higher dependability about quality network "connectivity and availability"
- ❖ Network monitoring and management significantly reduces the time it takes to track down issues.

 **Vizitech**
Solutions

Managed Services

Issues and Challenges

- Increased costs and shrinking budgets
- Lack of compliance and governance
- Reactive Incident Management
- Lack of resource optimization
- No Service Level Management
- Lack of capacity management

Customers experience service interruption that has tremendous impact on their business.

Productivity is interrupted -Why? Because they are waiting for the problem "to fix itself".

Main challenge is to change the "Break Fix mentality".

Benefits

- ✓ 24x7x365 Monitoring
- ✓ Minimized Downtime

Client's Quote

*"Outsourcing my IT needs to Vizitech Solutions has proved to be extremely valuable. With great customer service and attention to minute detail, they have been a strong pillar of support to my business. We could analyze **30%** reduction in IT infrastructure cost including the costs of both the infrastructure itself and IT support."*
